

Holyoke Medical Center

FOR YOUTH DEVELOPMENT®
FOR HEALTHY LIVING
FOR SOCIAL RESPONSIBILITY

Every 3 minutes, someone within the U.S. is diagnosed with a blood cancer. Only 30% of all patients are able to find a compatible bone marrow donor in their family. One treatment alone can ensure you save a life! Get swabbed to see if you are a match to someone in need! Donors need to be between the ages of 18-55 years old, in good health and willing to donate marrow if a match is made anywhere in the the U.S.A.
